

SHOP-PRO®

Shop-Pro Software is a cost effective and practical chatter avoidance tool kit used to achieve high speed-high performance machining within minutes.

After a few minutes of tap testing, chatter vibration free spindle speeds and depths of cut are found; resulting in significantly increased material removal rates.

Shop-Pro Applications:

Milling Processes
Solid and Sharp Endmill Cutters
Process Optimization

“Shop Doctor” listens to the machine, diagnoses the cause of chatter, and recommends safe yet highly productive cutting conditions.

Available in seven languages.

Compatible with CutPro for faster learning and application in shops.
