

# Creating the best-in-class DIGITAL MACHINING solutions WORLDWIDE

## MASTERPro X

A bi-directional **Mastercam** Translator for  
NC Program Verification and Feed Optimization in **MACHpro**

Automatically prepare toolpaths for processing in MACHpro to

Run physics-based process simulation to verify the safety and performance of machining processes

Optimize feed rates of a native Mastercam tool path to boost productivity while respecting the machine, and tool's physical limits

Import optimized toolpaths back in to Mastercam

Easy to use, click-and-go interface

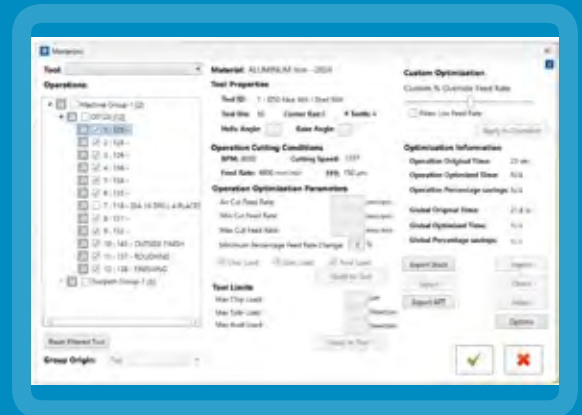

Upgrade to the full plug-in to work directly in Mastercam, store all settings, simulation and optimization results for maximum traceability and reproducibility
